ABOUT ME

Nairobi-based Product Designer and Frontend Developer with 8+ years of experience turning early ideas into user-centered, scalable digital products. Strong across product discovery, UI/UX strategy, high-fidelity interface design, design systems, user stories, agile product documentation, and responsive React/Next.js implementation. Current Lead Product Designer and Frontend Developer at PixeSci, shaping the company website, application experience, design system, frontend direction, and AI-assisted design-to-code workflow.

LANGUAGE

- English - Fluent
- Swahili - Native

EDUCATION

Bachelor of Business Admin with IT
Maseno University, KSM-Kenya
2015

Diploma in Product Design (UI/UX)
Moringa School, NRB - Kenya
2018

Diploma in Full Stack Software Engineering
Moringa School, NRB - Kenya
2025

CORE STRENGTHS

- Product discovery, user journey mapping, workflow definition, and MVP scope refinement.
- User-centered UI/UX design for web applications, dashboards, onboarding, content flows, and complex product surfaces.
- Design systems, Figma libraries, component specifications, responsive states, and design handoff documentation.
- Frontend development with React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Material UI, DaisyUI, shadcn/ui, and Redux Toolkit.
- User stories, acceptance criteria, Jira/Confluence documentation, backlog prioritization, and Agile delivery support.
- AI-assisted product building with Claude and Codex for ideation, implementation, refactoring, debugging, and documentation.

PROFESSIONAL EXPERIENCE

2025
-
Current

Lead Product Designer & Frontend Developer

PixeSci LTD | Albany County, New York - <https://pixesci.com/>

- Lead product design and frontend direction across the PixeSci website, application experience, design system, Figma product design, and implementation guidance.
- Created the company's new public website experience to support product positioning, market credibility, product storytelling, SEO foundations, product visuals, and demo-booking paths.
- Created the PixeSci Design System for layouts, components, interaction states, typography, spacing, color, responsive behavior, and design-to-code consistency.
- Redesigned and recreated the application experience from an earlier interface into a cleaner, more structured, market-ready product UI.
- Designed interface patterns for chat-to-workflow experiences, workflow context, artifact review, template management, audit logs, agent activity, software catalogs, and admin/security surfaces.
- Guide frontend implementation around React, Next.js, TypeScript, Tailwind CSS, shadcn-style/Radix primitives, Redux Toolkit, and Tauri-oriented desktop patterns.
- Use Claude and Codex to accelerate design-to-code iteration, implementation, debugging, refactoring, documentation, and product UI exploration.

2021
–
2025

Lead Product Designer & Frontend Developer

Ticet EDU LTD | Nairobi, Kenya

- Led UI/UX product design and frontend implementation for a zero-to-one EdTech platform focused on personalized and social learning.
- Owned UX strategy, information architecture, user flows, wireframes, high-fidelity UI, interactive prototypes, design systems, and developer handoff across web and mobile experiences.
- Conducted user research, competitor analysis, usability testing, and feedback synthesis to validate product decisions before and during MVP development.
- Designed core product flows including onboarding, learner dashboards, content discovery, creator tools, rewards systems, responsive layouts, and dark/light theme support.
- Created user stories, acceptance criteria, feature documentation, workflow notes, and Jira/Confluence-ready handoff materials to align design and engineering execution.
- Built frontend features using React.js, Next.js, TypeScript, Material UI, Tailwind CSS, and Redux Toolkit, translating Figma designs into responsive component-driven UI.
- Implemented global state management, integrated frontend components with backend APIs, and handled loading, empty, error, and responsive states across product flows.
- Reduced design-to-development handoff time by 40%, improved task-flow efficiency by 25%, reduced delivery cycle time by 30%, and improved early-stage tester satisfaction by 40%.
- Delivered 400+ high-fidelity screens, authored 400+ detailed user stories, and supported 120+ MVP features across web and mobile platform work.

2023
–
2025

Product Manager

Ticet EDU LTD | Nairobi, Kenya

- Owned roadmap strategy, backlog prioritization, MVP planning, feature scoping, and stakeholder alignment for a zero-to-one learning platform.
- Translated business goals, research findings, and product requirements into user stories, acceptance criteria, workflows, and Jira/Confluence-ready documentation.
- Prioritized backlog items using MoSCoW and impact-effort frameworks while balancing business objectives, user needs, and engineering capacity.
- Facilitated sprint planning, standups, reviews, retrospectives, and requirements sessions to maintain execution clarity and delivery cadence.
- Authored 400+ detailed user stories, delivered 120+ MVP features, reduced delivery cycle time by 30%, and improved early-stage tester satisfaction by 40%.

CORE STRENGTHS

- **Design:** Figma, Adobe XD, Sketch, prototyping, wireframing, design systems, interaction design, responsive UI, accessibility-minded UI design.
- **Frontend:** React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Material UI, DaisyUI, shadcn/ui, Radix-style primitives, Vite.js, Tauri-oriented UI patterns.
- **Product delivery:** Jira, Confluence, Atlassian, user stories, acceptance criteria, backlog management, Agile/Scrum, roadmap planning, product documentation.
- **Engineering workflow:** Git, GitHub, Bitbucket, Redux Toolkit, API integration, component architecture, design-to-code handoff.
- **AI-assisted delivery:** Claude, Codex, AI-assisted UI exploration, code generation, refactoring, debugging, implementation planning, and documentation.
